

EZ Connect ORDER FORM

This UL listed manual transfer switch allows you to safely connect generator power directly to your home's breaker panel. This device works with portable generators (up to 48kW) that do **NOT incorporate GFCI protection**. Multiple inlet options are available to allow various sizes of generators to be used. If your home does not have a main disconnect, a disconnect can be added to the EZ-Connect to ensure your home is **service entrance rated**. Add a power cord to ensure you have a reliable way to connect your portable generator to the EZ-Connect.
